

ABSTRACT

An information distribution system (1) for distributing a desired information answering a request information on at least one of a plurality of
5 displays (4, 6A, 6B) in response to a request information outputted by a mobile terminal (3) requesting the desired information includes a terminal location information collector (131) for collecting a location information of the mobile terminal (3), a display selector (121) for selecting at least one of the displays (4, 6A, 6B) based on the location information of the mobile
10 terminal (3) and an information distributor (122) for distributing a desired information in response to the request information on the selected display (4, 6A, 6B), so that the desired information can be browsed by selecting the displays (4, 6A, 6B) in accordance with information volume, thus enhancing usability for a user.
